

PREMIUM KITCHEN CABINETRY

# Stainless Steel Cabinets

Built like industrial equipment — and finished like a piece of design. Brushed Turkish 304 stainless steel outside, thermally treated Karagach elm within. Each kitchen is designed by our international team and produced in Almaty — engineered into your space, not simply pushed against a wall.

### 304 STEEL, DOWN TO THE LAST SCREW

Cabinet bodies and doors in high-quality Turkish 304 stainless steel with a brushed finish. Every bolt and screw is 304 stainless as well — there is not a single part in the build that can rust.

### HARDWARE MADE FOR DECADES

Stainless steel hinges brought from America — smooth action and precise door geometry across thousands of cycles. Industrial-quality construction, built to bring beauty to the space.

### THE WARMTH OF WOOD WITHIN

Inside the cabinets and drawers: thermally treated Karagach elm — noble, living wood set against the cool sheen of steel. Countertops your way: granite, thermally treated slab, or 304 stainless.

### A KITCHEN BORN FOR ITS PLACE

Every kitchen is custom designed and engineered to be built into its location — not cabinets bought and pushed into an area, but one architecture made for your space.

## MATERIALS & CRAFT

|                |                                        |
|----------------|----------------------------------------|
| BODIES & DOORS | Turkish 304 stainless, brushed         |
